# BARRIERS FOR SMES

- Lack of in-house bid resource – may also lack the back office support services required for contracts .
- Specialist - larger companies may have strengths across range of areas of business they can call upon.
- Timescales for tendering process for frameworks can span 12-18 months, call-off contracts typically shorter but another competitive process to go through once approved on a framework.
- Ability to secure funds/borrowing - also cost of bonds etc may be increased.
- Potential difficulties faced when proving financial security if new business
- Lack of resource to meet specific KPI's
- Difficulties understanding context of public procurement; frameworks typically 4 year duration, large number of contracting authorities put these in place each with own procurement processes and e-platforms
- Funding pressures on public sector bodies can mean cost is still a key driver despite Value for Money assessment

# POSSIBLE SOLUTIONS

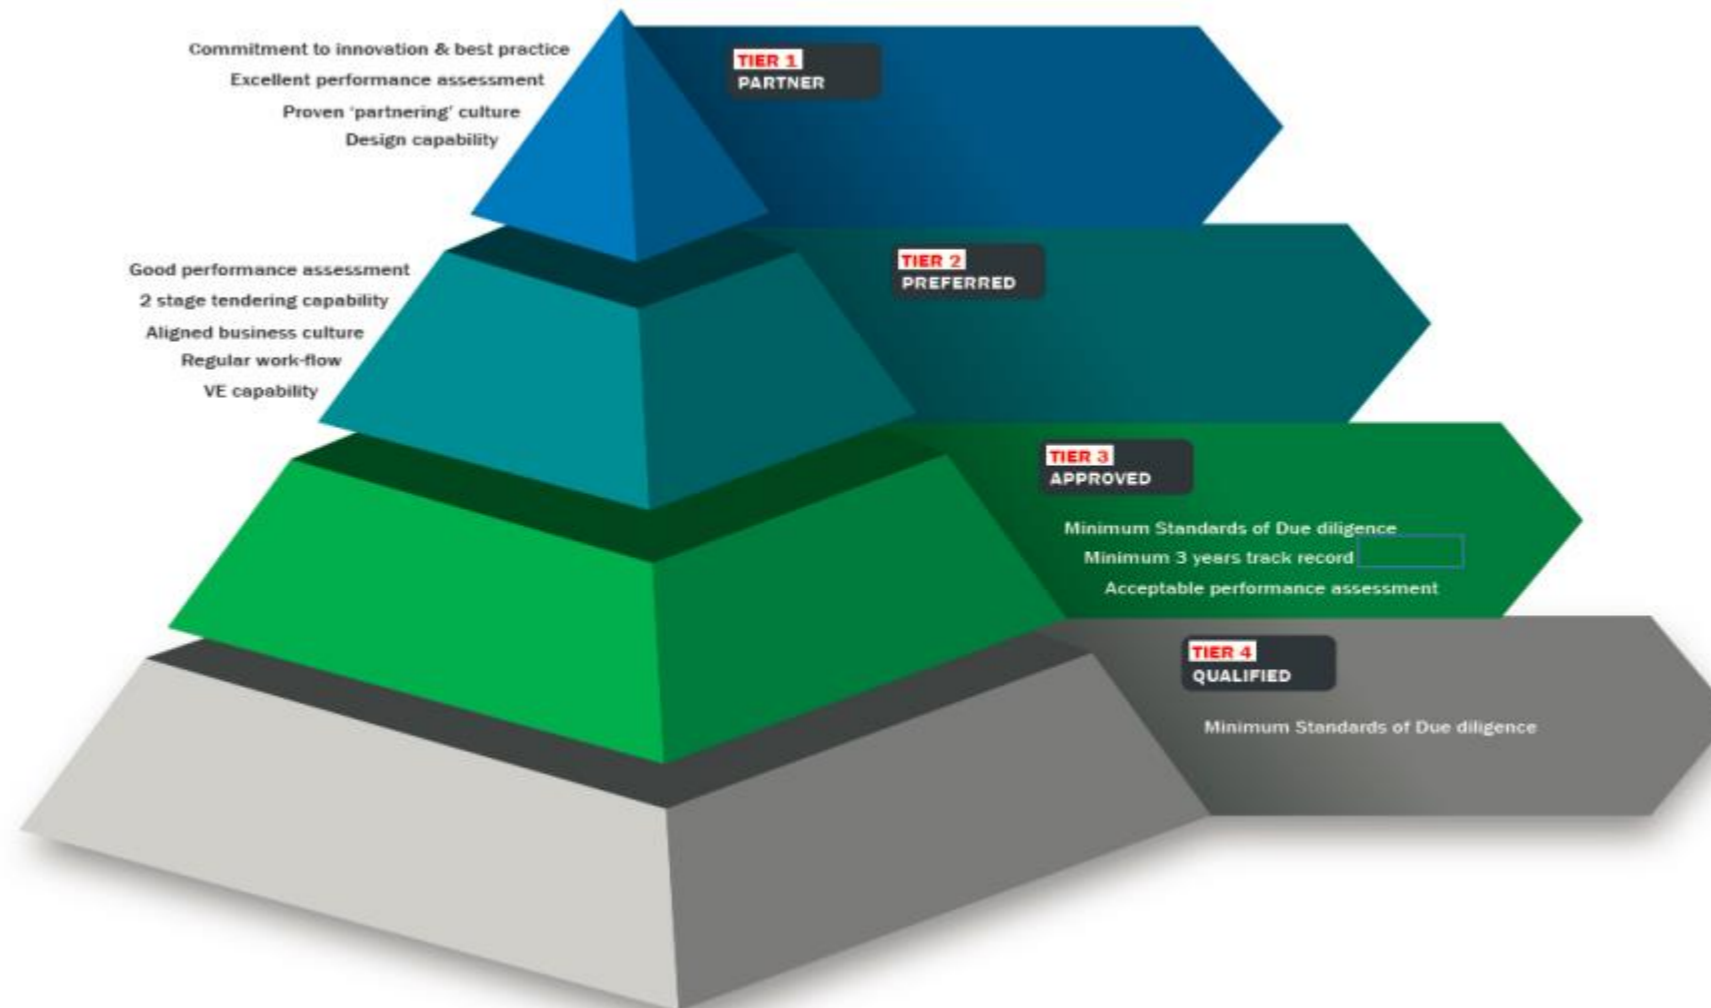

- Other contracting models; for example use of Dynamic Purchasing Systems
- Ensuring Lots are used where single contractor not essential
- Varying bid process; use of face-to-face interviews, sample packages of works to assess bidders
- Better advertisement of subcontracts to Tier 2, Tier 3, ... contractors
- Educating supply base to how to access opportunities; Xpress RES solution demand and supply tool <https://www.xpress-h2020.eu/online-resources/matchmaking-tool/>.
- Continuing engagement programme with SME suppliers; Meet the Buyer events, Preliminary Market Consultations (Reg 40, PCR 2015)
- Use of geographical lots where possible

# IN PRACTICE

## Supply chain engagement

HOME / SOCIAL VALUE / SUPPLY CHAIN ENGAGEMENT
