MEAT criteria for evaluation tenders

$$B = \frac{40.000 - HK1}{40.000} \times 8,6 + \frac{22 - HK2}{12} \times 2,6 + \frac{HK3 - 200}{300} \times 2,8 + \frac{HK4 - 255}{245} \times 2,15 + \frac{HK5 - 0}{16} \times 6,45$$

B – Total points

HK1 – Total price for order Eur s DPH (0, 40 000>

HK2 – Consumption in a defined unit „kW/100 km“. It affects the total operating costs during the entire period of use of the electric vehicle. < 10, 22 > Lower consumption = lower operating costs

HK3 – Combined range according to manufacturer (WLTP methodology), specified in a defined unit „km“. < 200, 500 >

HK4 – Luggage compartment (volume when the rear seat backrests are not shown in the defined unit) „l“. < 255, 500 >

HK5 – Optional equipment (total points according to the optional equipment provided). The aim was to favor vehicles with "better equipment" and to emphasize the quality element. < 0, 16 >
